centraleyes

Automating and Orchestrating your Cyber Risk and Compliance

Overview and Goals:

Leading enterprises face a challenge to establish consistent and effective risk management throughout their entire organization. Companies in every industry are affected by a growing number of risks and their complexity, which continue to increase year over year. Outdated solutions like spreadsheets and GRC systems are holding teams back, especially for companies managing branches across multiple geographical locations.

Risk management is a critical element in protecting organizations from reputational, operational and financial damage. Proper management of risks can only be achieved by understanding, quantifying, and mitigating internal and external risks, while ensuring compliance with all relevant standards and regulations.

The ability to manage risk and compliance comprehensively throughout an organization from a single platform opens up a world of efficiency and opportunity for risk management teams.

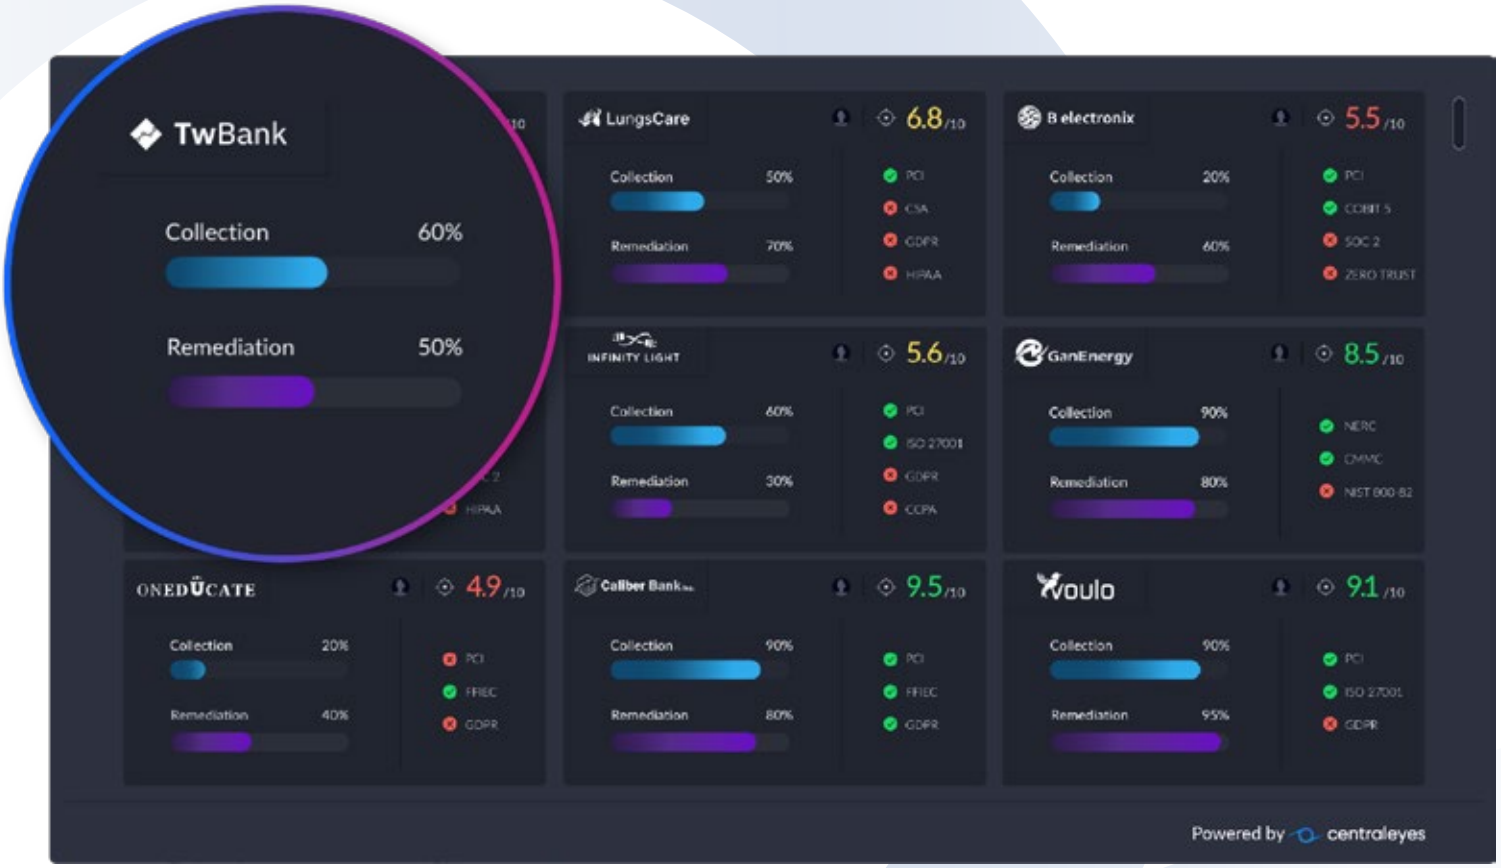

What we Offer

Centraleyes provides the only dedicated Multi-Tenant Management Console. This allows leaders to deploy and oversee risk management throughout an organization from a single platform.

The ability to offer individualized risk management solutions specific to location while maintaining a consistent level across the company creates a stronger overall approach to risk, with maximum efficiency and capabilities.

Cutting-edge visualization of data within the platform enables enterprises to elevate their ability to manage risk and compliance easily across branches, nationally, or across the world.

Centraleyes: Next Generation GRC
Cyber Risk Management

Banks, telecom companies, health organizations, insurance companies and all other enterprises need a GRC platform that offers high visibility and clarity to stay ahead and actively manage their risks as they work to meet greater compliance requirements. A highly effective GRC program is crucial to thrive in today's rapidly evolving risk and compliance landscape.

Centraleyes is a powerful no code, cloud-native, multi-tenant and real-time risk management platform that is changing the world of GRC.

The next generation Centraleyes cyber risk management platform has completely automated the way traditional GRC tools work. The platform frees risk and security teams from tedious, repetitive labor so they can focus on strategic decision-making and business success.

Centraleyes was developed based on a methodical customer-centric approach, where feedback from over 200 companies uncovered the greatest GRC pain points in the market.

Centraleyes is on a mission to become the best GRC platform on Earth.

Through the power of automation, we help companies overcome their biggest GRC challenges, transforming risk management into a dynamic, easy, and ongoing process, rather than a overwhelming amount of manual and inefficient work.

By always focusing on the customer's outcomes, we make GRC a more efficient, more intuitive, and ultimately, a more beautiful experience.

The Centraleyes Solution

Implement and onboard in under 60 seconds, train and operationalize in only a few hours

Immediately automate risk and compliance management with over 100+ built-in frameworks and standards. Utilize preloaded surveys, analyze and evaluate through integrated assessments — or upload your own

Implement automated actionable remediation steps and easily analyze data with visual dashboards

Generate real-time, comprehensive, & intuitive reports, and effortlessly convey your cyber risk and compliance posture to executives and auditors

The results are clear

Centraleyes gives information security and compliance teams the unmatched ability to see, understand, and mitigate costly risks and vulnerabilities. Organizations that deploy Centraleyes save time and resources by leveraging features such as Centraleyes SmartMapping, an automated risk register and an automated remediation planner. By implementing the Centraleyes Platform you will sustain cyber resilience in a world of ever-evolving risks while continuously meeting compliance across multiple industry frameworks such as: **NIST, ISO 27001, FFIEC, PCI DSS, SOC2, GDPR** and many more.

What Can You Do With Centraleyes?

Implement and Onboard in Minutes

Centraleyes Use-Case

Internal Risk Management

Internal risk management thrives with accurate risk quantification, mitigation, and remediation of inherent and residual risks. Centraleyes' comprehensive risk assessments enable you to identify risks, prioritize them via our automated Risk Register, track remediation, and generate informative progress reports with ease.

Onboard and conduct risk assessments in 60 seconds

Save hundreds of hours by leveraging our cutting-edge platform's 100+ pre-loaded frameworks and automation

Turn risk management into a collaborative process

Upload and share your own internal assessments to the platform to boost collaboration and track

Customize the platform to your needs

Fully customize our enterprise risk register with your specific risks, controls, processes, and use cases. Configure impact and probability levels, tag open remediation tasks, and map out relevant risks.

Quantify and manage inherent and residual risk across the business

Eliminate time-consuming manual processes with automated remediation planning. Oversee mitigation plans that are

Access data-rich insights and reporting tools

Maximize executive-level support and decision making with intuitive reports that highlight cyber risk in business terms.

Centraleyes Use-Case

Compliance Management

Centraleyes releases the pressure from compliance management and makes the process simpler than ever before. With our centralized platform, you can manage every facet of your compliance process to ensure you're continuously meeting industry standards and regulations.

Get started in only 60 seconds

Onboard in under a minute and immediately get started with a powerful solution to ensure compliance across industry standards, security frameworks, corporate and regulatory requirements.

Automate and orchestrate all the manual work

Gain access to 100+ leading frameworks and standards. Use SmartMapping to pre-populate multiple frameworks and automated remediation to guide you to full compliance.

Gain real-time visibility into your compliance

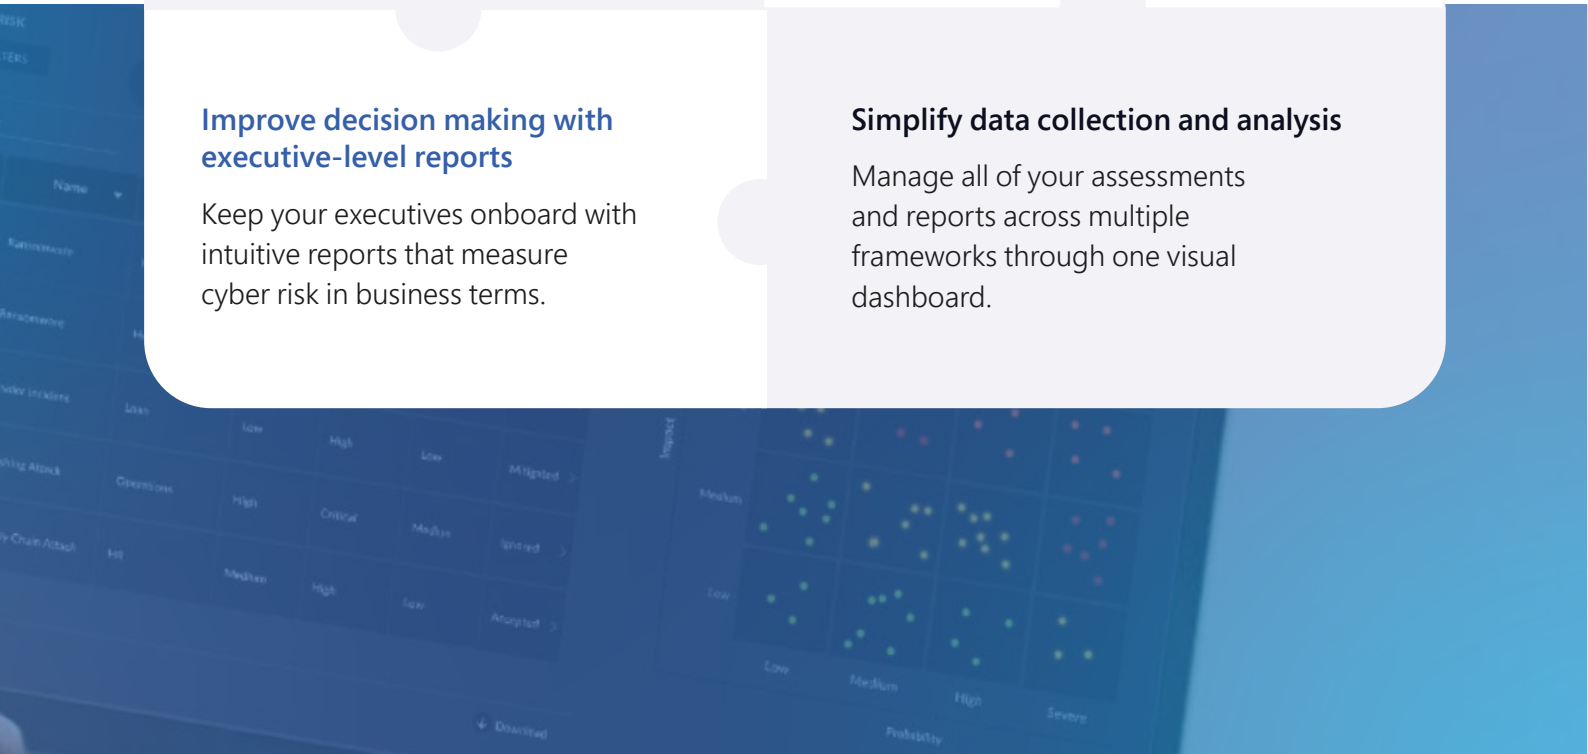

Centraleyes translate data into a real-time picture of compliance levels, the remediation tasks needed to close gaps, and powerful insights to guide next-steps.

Improve decision making with executive-level reports

Keep your executives onboard with intuitive reports that measure cyber risk in business terms.

Simplify data collection and analysis

Manage all of your assessments and reports across multiple frameworks through one visual dashboard.

Centraleyes Use-Case

Vendor Risk Management

Third-party vendors are an extension of your business. Often, they are granted access to the most sensitive corporate data. Achieve resilience with your vendors and their supply chain- at scale. Centraleyes combines automated scanning, third- and fourth-party risk assessments, and facilitates due-diligence from the onboarding process and beyond.

Onboard vendors in less than 60 seconds

Save hundreds of hours of manual follow up and work with self-attestation by vendors and access to 100+ pre-loaded frameworks.

One dashboard for all your vendors

Continually assess, categorize, and prioritize hundreds of vendors through one centralized dashboard.

Achieve faster and more efficient remediation

Use automated remediation planning to track progress and gain valuable insights into a vendor's risk exposure.

Take a hybrid approach to vendor risk management

Access the only hybrid vendor risk solution that ensures you are consistently updated of any security gaps in a vendor's risk profile.

Generate executive-level reports

Provide your executives with actionable insights that identify where your risks lie, all in real-time.

Centraleyes Use-Case

Executive Reporting

Successful governance of risk management requires full visibility and understanding of business-level risk to make data driven decisions. Keep your leadership team well informed to improve the decision making process with Centraleyes. Turn complex technical risk into intuitive visual reports that highlight your company's business risk exposure through empirical trends, financial quantification, and business assets.

Visualize your risk exposure

Illustrate your risk using interactive graphs, a 4D risk matrix, gap matrix, business alerts, remediation matrix, and attack funnels.

Improve the decision making process

Provide executives with data-driven business use cases that justify further cybersecurity investments.

Eliminate tedious manual work

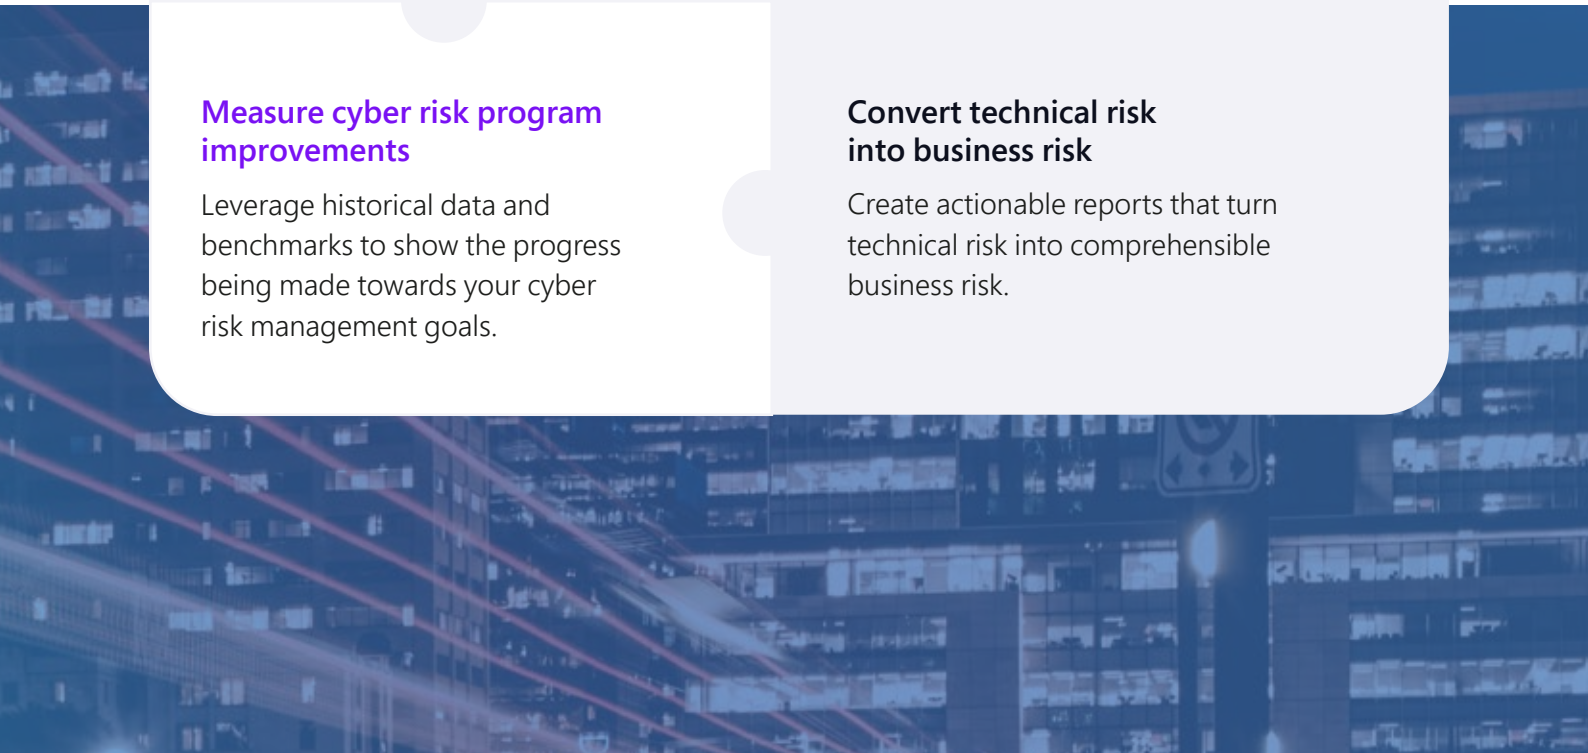

Save hundreds of hours with automated report creation synthesized from captured internal survey & vendor risk data.

Measure cyber risk program improvements

Leverage historical data and benchmarks to show the progress being made towards your cyber risk management goals.

Convert technical risk into business risk

Create actionable reports that turn technical risk into comprehensible business risk.

Centraleyes Use-Case

M&A

In mergers and acquisitions, value and revenue are the first and foremost business goals. But security risks are real. New privacy laws and federal mandatory disclosure policies increase the impact of cyber risk exposure on post-merger valuations.

Onboard new companies in minutes

Apply 100+ pre-loaded industry frameworks and standards to any company in your portfolio.

Improve your due diligence processes

Quickly assess and score investment opportunities across multiple, relevant frameworks at scale.

Automate and orchestrate tedious, manual tasks

Understand your investments risk posture in real-time, track progress, and minimize exposure to risk with automatically generated remediation steps and insights.

Create industry-specific data benchmarks

Maintain your competitive advantage by turning the data collected from the M&A process and your portfolio into deep industry insights, steps and insights.

Simplify executive level reporting

Provide your executives with actionable insights that identify where your risks lie, all in real-time.

Centraleyes Use-Case

Partners

Partner with Centraleyes today to leverage the most advanced risk and compliance platform on the market, and put us to work with your clients. Centraleyes revolutionizes how businesses quantify and manage cyber risk and compliance through a variety of solutions that can all be managed in a multi-tenant, cloud native SaaS solution.

Onboard new partners in 60 seconds

Apply 100+ pre-loaded industry frameworks and standards to partner companies.

Protect yourself from third-party risk

Quickly assess and score partner companies across multiple, relevant frameworks via a single dashboard.

Automate manual risk management tasks

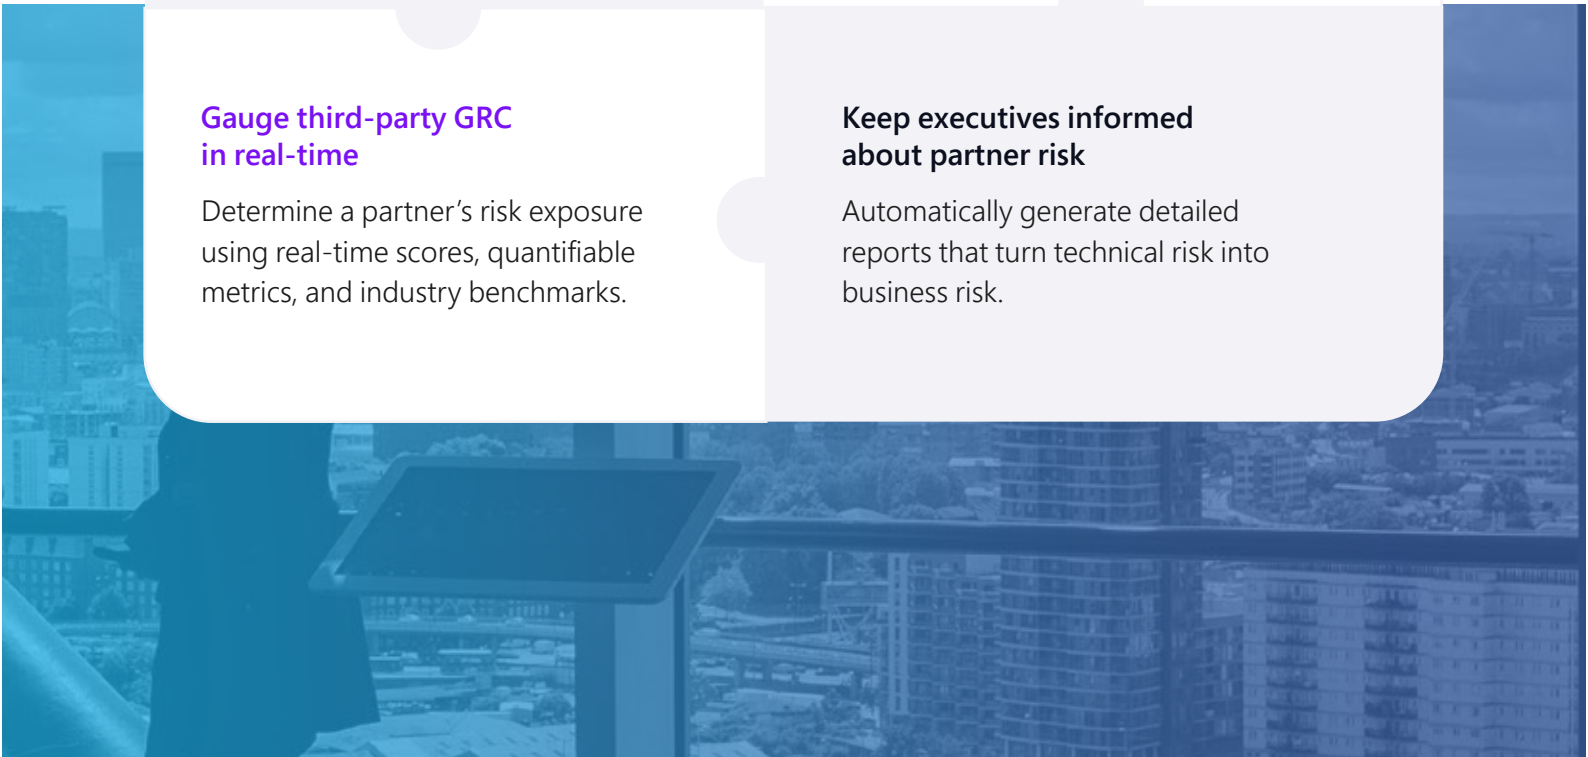

Automated remediation planning and orchestration help you track, prioritize, and mitigate partner risk.

Gauge third-party GRC in real-time

Determine a partner's risk exposure using real-time scores, quantifiable metrics, and industry benchmarks.

Keep executives informed about partner risk

Automatically generate detailed reports that turn technical risk into business risk.

centraleyes

Next Generation GRC

Centraleyes is the industry's latest, most advanced cloud-based integrated cyber risk management platform. Centraleyes gives organizations the unparalleled ability to automate and orchestrate their entire cyber risk and compliance processes. Centraleyes provides an exceptional ability to see, understand, and react to cyber risks in a dynamic and effective way. Organizations that deploy Centraleyes save time and resources, and increase their cyber resilience in a world of ever-evolving risks. It is truly cyber risk management reimagined.
