

Make Smarter Acquisitions Avoid Unwanted Surprises

When assessing a potential investment, their governance, risk, and compliance shortcomings can quickly impact your ROI. A careless acquisition could quickly lead to cybersecurity exploits, value damage and challenges to future growth. At the same time, in a dynamic market, you cannot afford to spend months evaluating risk.

Why You Need Centraleyes

Multiple Portfolio Assessments

Simultaneously deploy individual Centraleyes instances to each target with one-click integration.

Measure Compliance

Measure prospects against 100+ pre-loaded industry standards and frameworks.

Simplify Evaluation

Leverage intake questionnaires mapped to users, control groups, and frameworks. View results at a glance with the cutting-edge centralized dashboard.

Score and Remediate

Assign a risk score to each target, empower clients to improve security posture with remediation advice, and track progress based on predefined goals.

What Can You Do With Centraleyes?

Manage hundreds of M&A targets via one centralized dashboard.

Deploy a tenant for each target with a single click.

Set clear deadlines, responsibilities, and goals.

Assess, categorize, and prioritize via comprehensive analytics.

Employ faster remediation through artificial intelligence & automation.

Leverage cutting-edge reports and visualization.

Track progression with real-time and historical data.

Identify high-risk targets through a hybrid approach.

Save time with pre-built, pre-mapped questionnaires.

Streamline evaluation through intuitive risk scoring.
