

# Automate and Orchestrate Your Internal Risk Management

Businesses today face an extraordinary array of risks to their cyber security, with changes and updates occurring at an unprecedented pace. Legacy GRC tools and processes are simply incapable of keeping up with the pace.

Save hundreds of hours quantifying and managing inherent and residual risk and overseeing mitigation plans with Centraleyes —a fully automated, single cutting-edge solution that streamlines internal risk management.

## Why You Need Centraleyes?

### Implement in a Single Day

Configure the platform in minutes to fit an organization's unique structure and needs

### Next-Gen Automated Risk Register

Meet the only automated risk register in the world. You can fully customize our risk register to the needs of your organization

### AI-Powered Remediation & Data Analysis

Implement automatically generated actionable remediation steps and easily analyse data via a clear visual dashboard

### Simplify Executive Level Reporting

Generate reports that can be understood in clear terms to improve strategic decision-making at board level

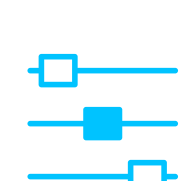

## What Can You Do With Centraleyes?

The Centraleyes platform enables each company to quantify, prioritize and mitigate operational risks, and easily manage their entire life cycle within the platform's environment. Through a single pane of glass, you are able to conduct risk assessments efficiently, quantify and manage inherent and residual risk and oversee the mitigation plans, all of which are automatically created by the platform.

With our **Next-Gen proprietary automated risk register**, the platform loads in risk scenarios in real time while also allowing users to add additional risks. This allows the user to map out and define their company's unique risk scenarios and all of their specific needs.

## Implement and Onboard in Less than One Day

Setup your instance in minutes by leveraging the platform's pre-loaded frameworks and automation capabilities. Upload your own internal assessments to the platform and effortlessly share across the company with intuitive collaboration tools. Train you and your staff in only a few hours.

Leverage a no-code deployment for ease of use

Apply 100+ pre-loaded industry frameworks and standards

Integrate quickly with dedicated APIs and multi-tenancy support

## Automate and Orchestrate all the Manual Work

Centraleyes simplifies data collection and analysis. Save hundreds of hours and manage all of your assessments and reports across multiple environments in one cutting-edge visual dashboard. Understand your risk posture in real-time, track progress and minimize risk with automatically generated remediation steps and insights.

Utilize Smart Questionnaires to map risk levels across frameworks and industries

Free up security resources and optimize risk response with AI-powered remediation planning

Quantify, prioritize and mitigate operational risks. Create and manage risk profiles through a centralized dashboard

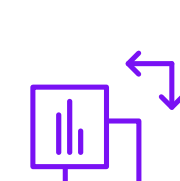

Evaluate your security posture through quantifiable metrics and industry benchmarks

## Simplify Executive Level Reporting

Save resources and time using the automated analysis and reporting tools, allowing you to track progress over time. Maximize executive level support with easily comprehensible reports that highlight accurate cyber risk in business terms to make informed decisions, and get buy-in for future projects.

Automatically generate reports, improve satisfaction and productivity

Convert technical risk into business risk showing empirical data trends

Cutting-edge visual dashboard, clear and easy to comprehend
