

Turn Complex Technical Risk Into Actionable Insights for Leadership

The increasing frequency and complexity of cyberattacks has made cyber risk management crucial to the future of any company. Successful risk management starts at the top and requires your executive team to have full visibility and understanding of business-level risk.

Keep your leadership team in the loop and improve the decision making process with Centraleyes Boardview. Turn complex technical risk into cutting-edge visual reports that highlight your company's risk exposure, empirical trends, cybersecurity improvements over time, and more.

Why You Need Centraleyes

Meet Goals

Meet fiduciary and compliance requirements through advanced data orchestration and threat intelligence.

Smarter Reporting

Deliver meaningful insight to executives and board members with cutting-edge visualization that converts technical risk into business risk.

Better Budgeting

Present streamlined financial reports highlighting your cyber landscape, cost centers, and ROI for data-driven budget allocation.

Cyber Progress Management

Set clear targets for risk management and compliance and seamlessly measure progress towards each goal using empirical trend analysis.

What Can You Do With Centraleyes?

Centraleyes gives your leadership team real-time visibility into your company's risk exposure. Convert complex technical risk into business risk with quantifiable metrics, interactive graphs, and industry benchmarks that show empirical data trends.

With Boardview, you can answer the most important questions:

1

What is your cyber status/posture?

2

Are we progressing or regressing?

3

What did we do to improve?

4

What are the costs involved?

Centraleyes offers companies a reporting solution that easily creates visual and detailed executive-level reports via a single pane of glass. Improve the decision making process, so you can justify cybersecurity investments with reports that showcase current compliance, risk exposure, measurable improvements, financial data, and more.

Go From Onboarding to Customized Reports in Minutes

Get onboarded in as little as 60 seconds, giving you access to 100+ pre-loaded frameworks for all your data reporting needs. Centraleyes makes it easy for you to create customizable reports designed specifically for your executive teams.

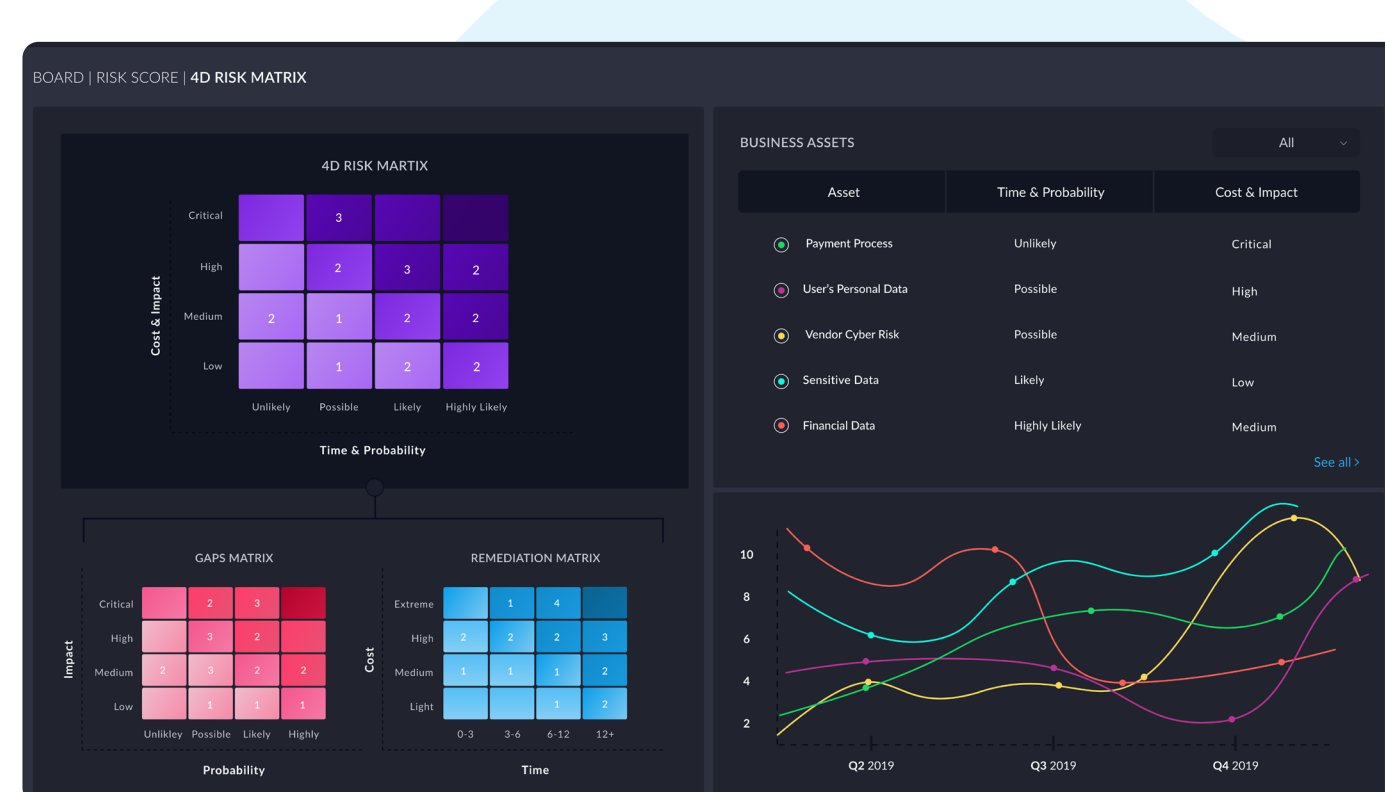

Save countless hours converting data into executive-level insights.

Apply 100+ pre-loaded industry frameworks and standards.

Use Smart Mapping and integrations to automatically measure compliance against other frameworks and standards.

Automate the Entire Reporting Process

Centraleyes simplifies the entire risk assessment and remediation process allowing you to automatically process data and create reports that show measurable progress. Save hundreds of hours by automating the collection and analysis of technical risk through one cutting-edge, visual dashboard. Understand your risk posture in real-time, track progress, and minimize your exposure to risk with automatically generated remediation steps and insights.

Create customized reports based on the data you collect through your risk assessments and ongoing remediation efforts.

Ensure cybersecurity investments are paying off with deep insights into current and historical performance.

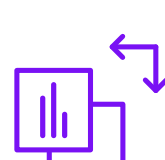

Automatically gain visibility into the exact actions your organization is taking to improve security and compliance.

Simplify Executive Level Reporting

Save resources using automated analysis and report tools that allow you to track progress over time. Maximize executive-level support with easily comprehensible reports that highlight how cyber risk is affecting your business. Break data down into visual reports that represent your current state of affairs, so you can make informed decisions and maximize communication with the executive-level.

Identify the total cost of your risk while discovering potential cost savings from further investments into cybersecurity and compliance.

Convert technical risk into business risk with quantifiable metrics and industry benchmarks through empirical data trends and intuitive scoring systems.

Convert compliance investments from a cost center into a business enabler with the ability to measure your progress towards individual compliance standards.
