

Building Your Cyber Insurance Risk Program - Overview

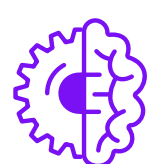

Cyber Risk Management for Insurance Brokers

Embrace the Future of Cyber Insurance with Centraleyes

Seamlessly deploy a cyber risk program for your cyber insurance portfolio clients, reduce your risk exposure and claims, gather actionable insights, and provide your clients with real value using the Centraleyes cyber risk management platform.

The Most Powerful Platform to Quantify and Mitigate Cyber Risk

Automate

Automate manual application processes and risk calculations with advanced algorithms and models

Visualize

Easily communicate cyber risk, translate technical risk into business terms, and drive smarter business decisions with actionable insights

Analyze

Real-time data to give you deeper insight into your clients' greatest risks, and best paths to lower exposure

Take advantage of Our Automated Risk Management Solution

As a cyber insurance broker you process and manage large numbers of customers, collecting many data points to provide back to the various carriers. Improving your clients' cyber resilience will increase approval rates and lower the premiums on their policies. The Centraleyes SaaS, cloud-based platform allows you to easily collect client information and streamline the risk quantification process, as well as generate a completed application to send directly to the carriers of your choice with a click of a button.

Once you assess their risk posture, you can help clients reduce risk exposure with automated remediation workflows that identify gaps and provide mitigation paths. By enhancing your clients' security resilience you can improve premium rates and increase the chances of renewal in following years.

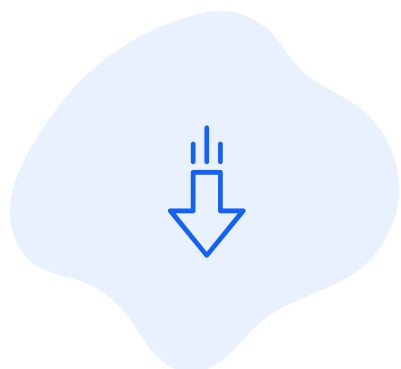

Tailored Insurance Brokers Solutions from Centraleyes Risk Management:

Digitize online application process and automatically assess their risk posture

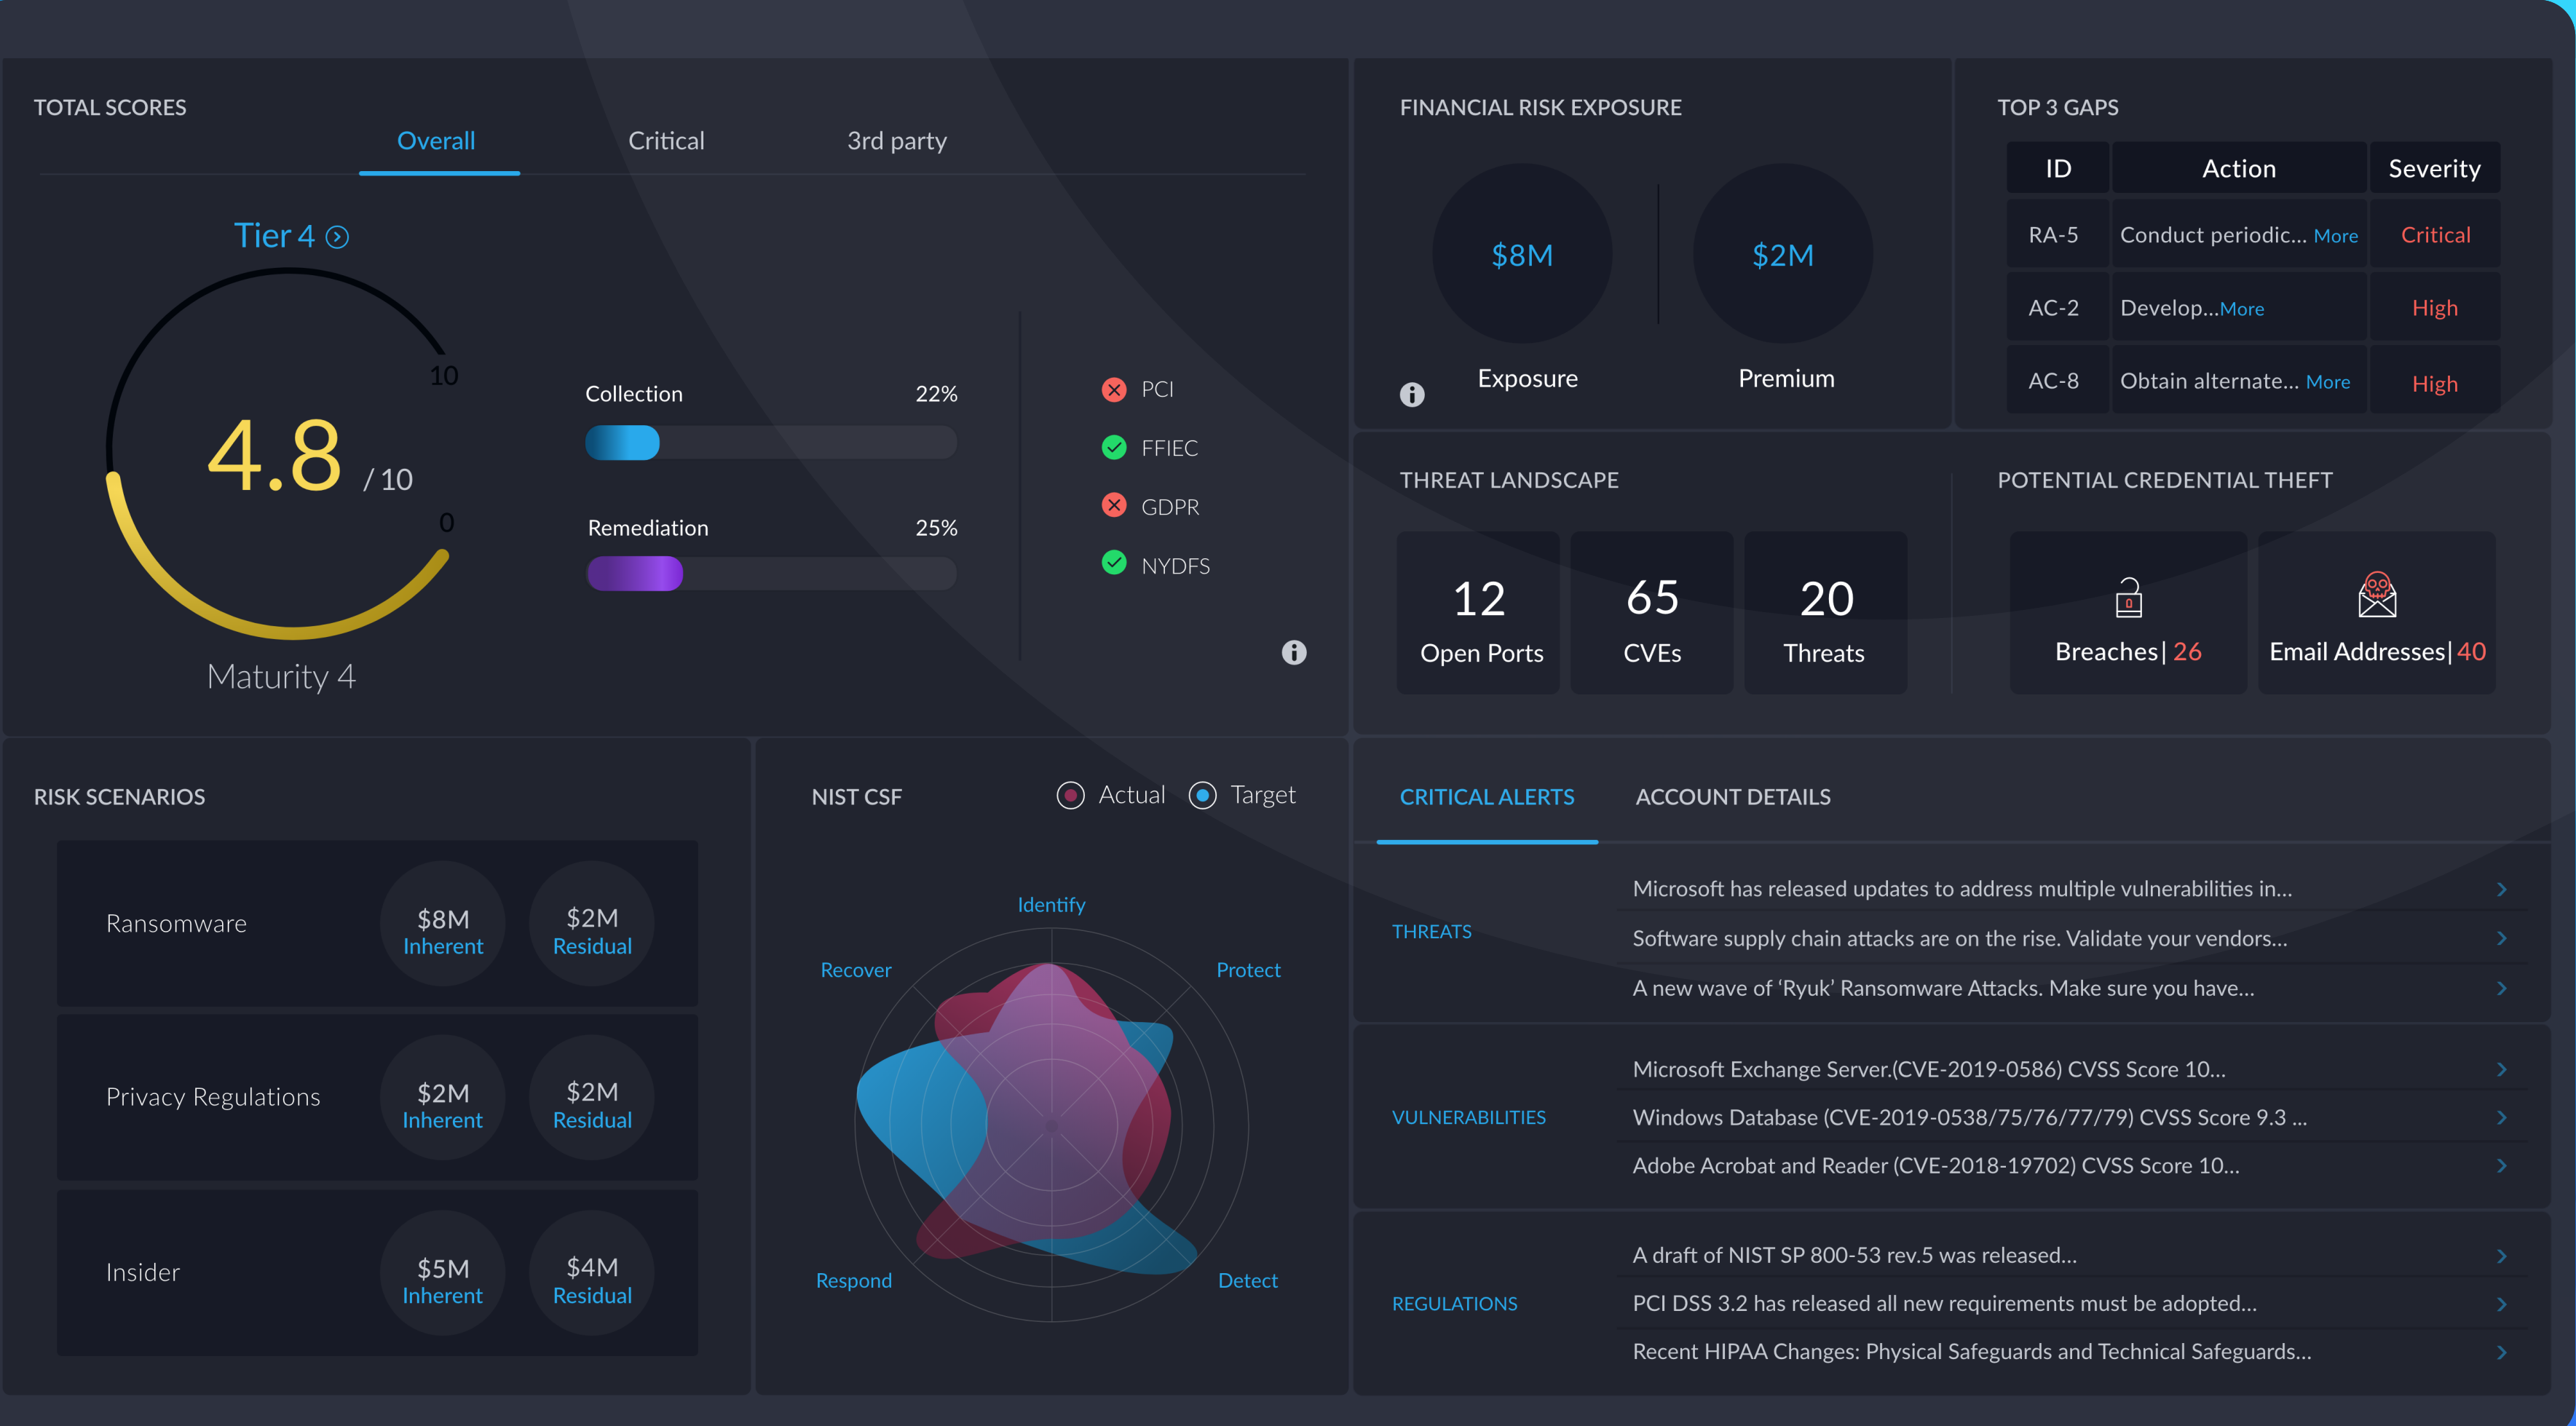

Generate carrier specific applications at a click of a button

Provide insights and actionable best practices to lower risk exposure

Increase client approval rates while ensuring competitive proposals

Deploy a Successful Cyber Insurance Program with Centraleyes

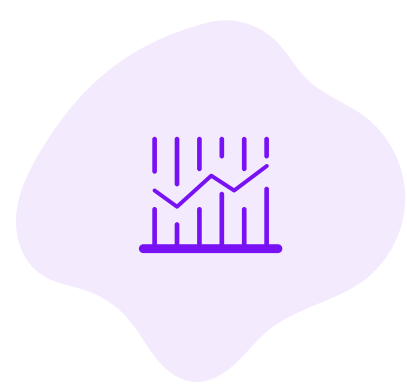

Automate Data Collection Through Integrations

Leverage automation and orchestration to decrease manual labor by integrating with existing security tools via dedicated APIs, connecting qualitative and quantitative sources of data.

Analysis

Quantify risk through both numeric and financial metrics. Enable better decision making through deep insights. Provide customers with information on everything from return on investment (ROI) to data breach costs.

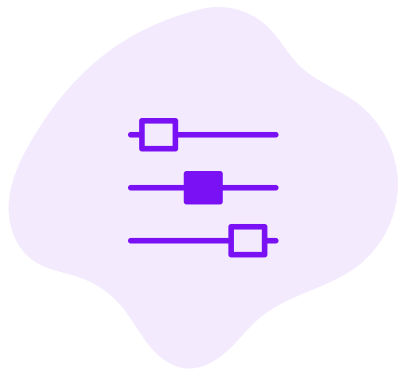

Industry Benchmarking

Figure out what’s working for clients, and where they need to improve. Combine multiple data feeds including threat intelligence, vulnerabilities and regulations. Analyze and benchmark that data against industry-specific use cases to drive the decision making process.

Reduced Risk, Improved Service

The most enduring challenge of cyber insurance is that poor customer security has the potential to put your own firm at risk. Centraleyes empowers you to mitigate that risk while strengthening the relationship and the value you give to your clients.

White-Label Service

Enhance your cyber risk practice with Centraleyes. Provide customers with a dedicated framework that helps them stay covered based on their own risk and compliance needs. Draw in more clients through smooth, quick onboarding, and cutting edge technology.

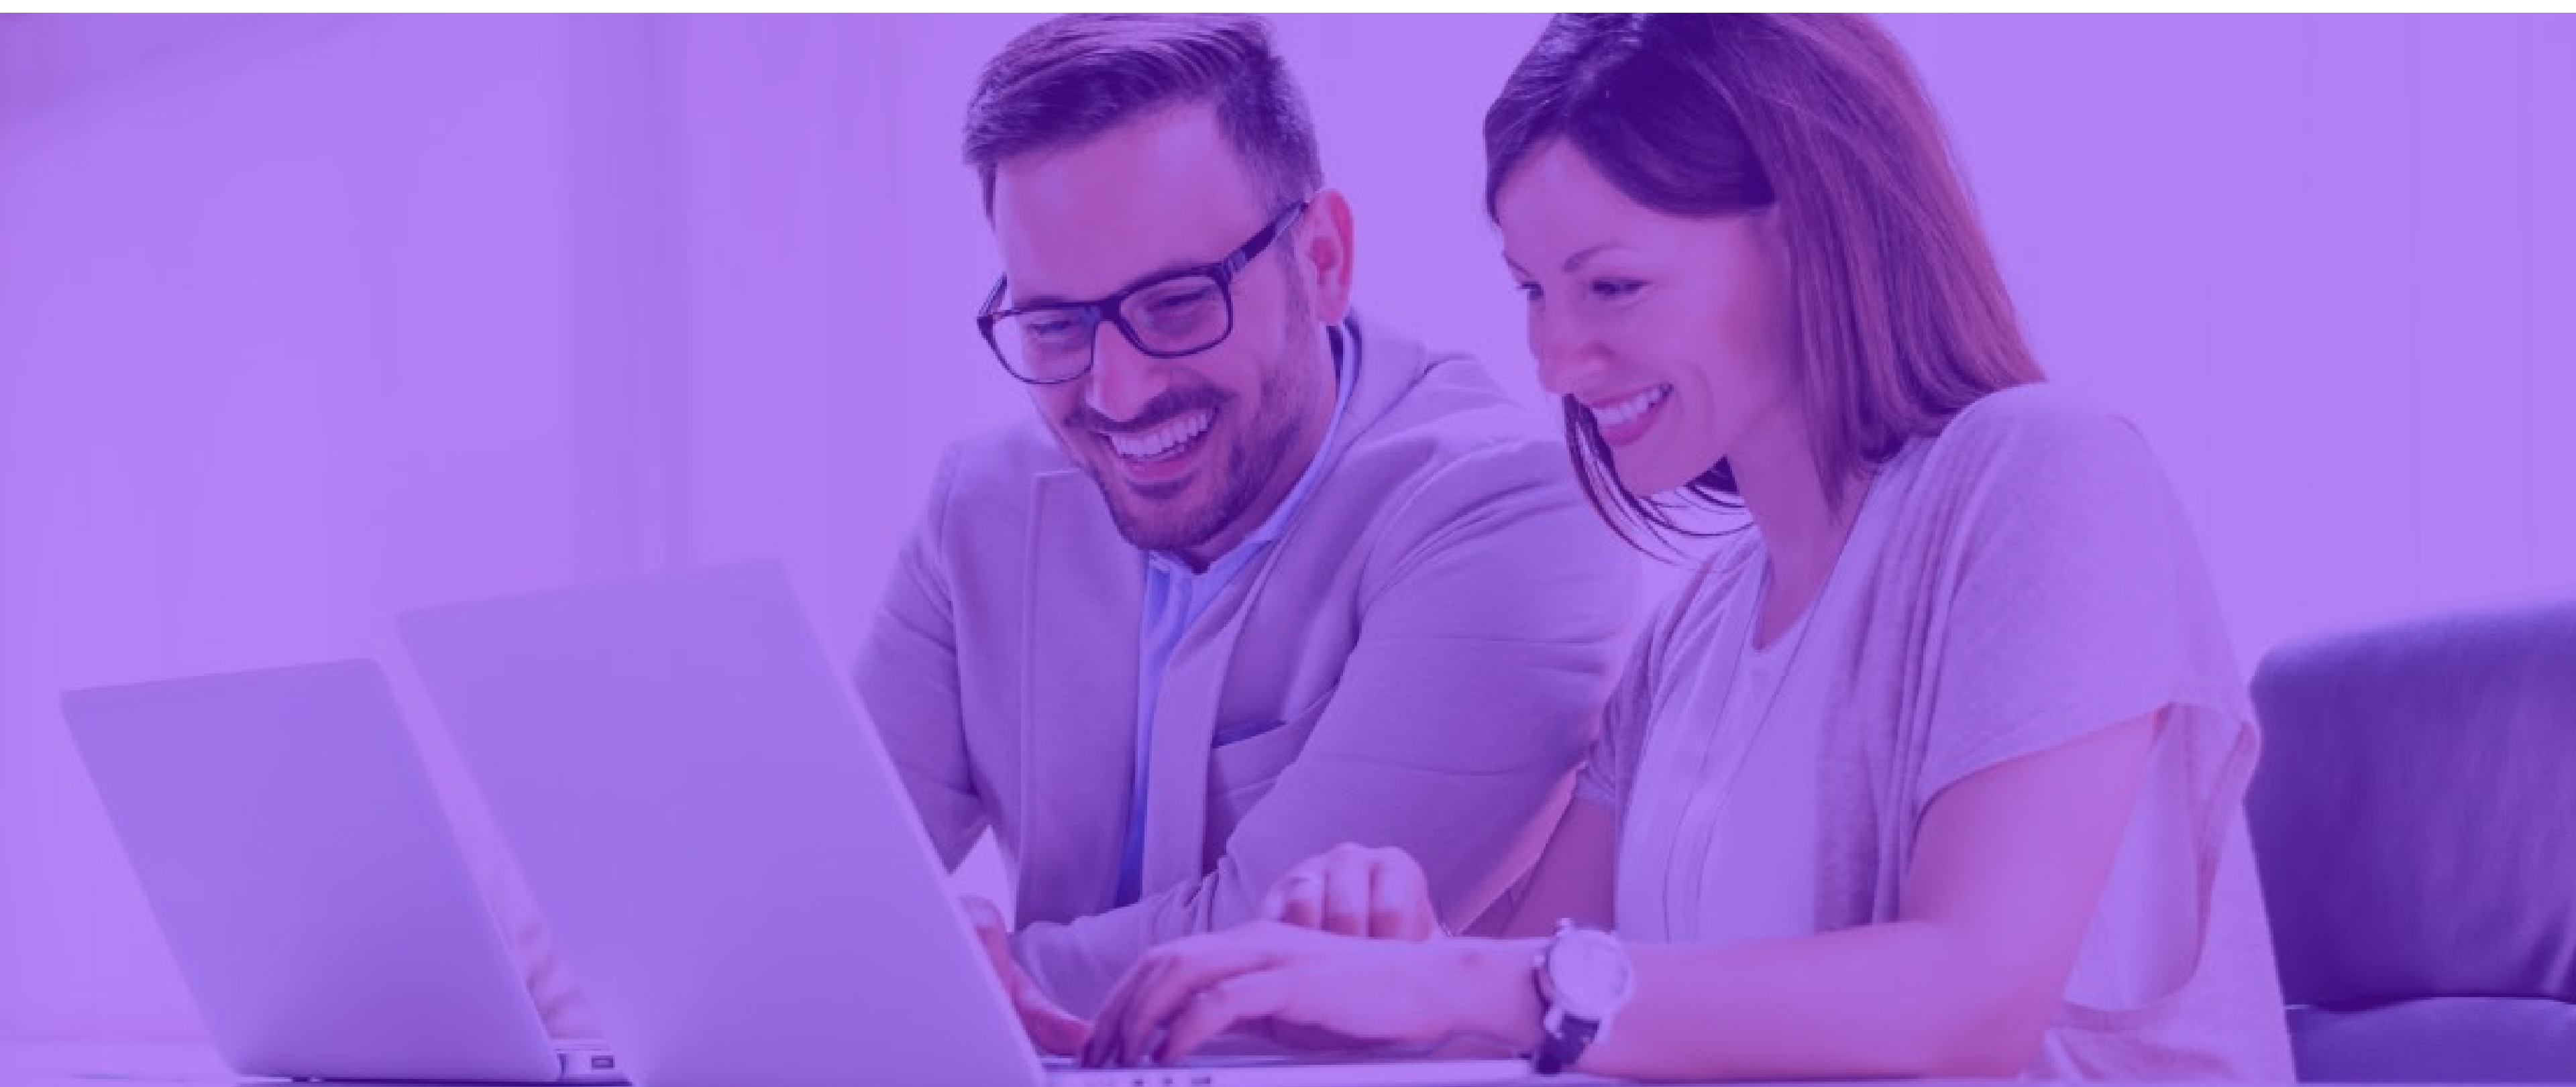

Actionable Advice

Gain deep insights into your client's cyber posture through smart surveys and questionnaires, live data feeds and external threat intelligence. Offer actionable remediation advice to customers through a powerful visual dashboard. Reduce risk and increase profits by incentivizing customers to improve their risk profile.

Flexible Usage

Help clients in regulated sectors accelerate compliance. Evaluate vendor risk, and help customers more effectively analyze their security posture. Publish streamlined, comprehensive executive reports with ease.

Cyber Insurance as a Service is Here

Centraleyes is a next-generation integrated cyber risk management platform that gives you everything you need to get started

Automate manual work, empower your agents, de-risk your portfolio, and create new revenue streams with a platform that automates risk management, transforming data into real-time insights

Arm your clients with an intuitive solution to protect their own systems and data, reducing their risk exposure and increasing security posture via actionable remediation steps and best practices

Apply data collected to support other industry-leading frameworks and standards such as: NIST, ISO, PCI, SOC 2, GLBA, NYDFS, and more

Leverage the Centraleyes Platform to Allow Your Clients to Do More

Centraleyes is a next-generation integrated cyber risk

With the Centraleyes platform you gain a significant competitive advantage as a cyber insurance broker. Benefit from the ability to consolidate and streamline the application process and reporting, as well as from managing your cyber risk program in a next generation platform that allows you to:

- Automatically map application data to risk and compliance frameworks
- Create automated and customized risk scenarios
- Manage third-party vendor and supply chain risk
- Translate technical cyber risk to clear business impact for the board of directors

Reduce Costs

Cut out unnecessary overhead with a platform that requires no development time. Arm your sales team with a platform that allows them to focus on customer acquisition. Corner the market with a program that automatically scales and improves as it matures.

Scale with Confidence

Move away from legacy systems onto a platform that provides everything you need for risk management. Expand your program without worrying about hardware or software complexity. Reduce both your threat surface and operational overhead.

Onboard with Ease

Eliminate cumbersome onboarding documentation. Reduce client frustration and gain more accurate information with a real-time, cloud based simple onboarding questionnaire. Introduce clients to a streamlined, intuitive risk management platform with no learning curve, and lose fewer sales.

Reclaim Lost Time

Ensure your employees spend less time on manual work and more time helping clients. Replace manual spreadsheets and outdated GRC tools with a streamlined, dynamic platform. Improve both satisfaction and productivity.

Turn Cyber Insurance From a Liability Into an Opportunity.
Better Risk Management Starts Here

Centraleyes is the industry's latest, most advanced cloud-based integrated cyber risk management platform. Centraleyes gives organizations the unparalleled ability to automate and orchestrate their entire cyber risk and compliance processes. Centraleyes provides an exceptional ability to see, understand, and react to cyber risks in a dynamic and effective way. Organizations that deploy Centraleyes save time and resources, and increase their cyber resilience in a world of ever-evolving risks. It is truly cyber risk management reimagined.
