

| Next Generation GRC for Higher Education

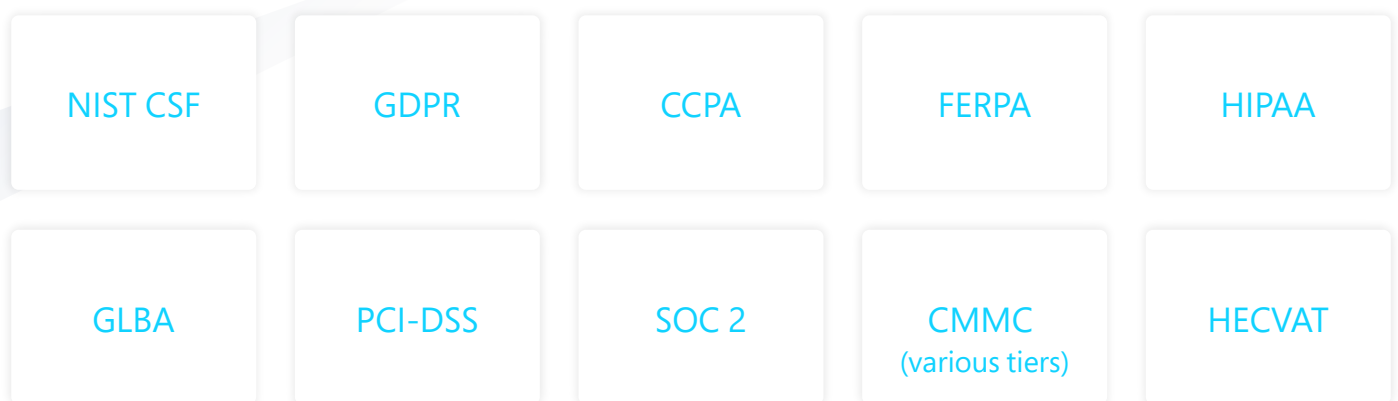

As the focus on protecting students' privacy increases, the demand upon higher education organizations to ensure the integrity of that data has soared. Today most colleges and universities are required to meet compliance standards such as CCPA, GDPR , NIST and more. With many schools processing student loans and tuition payments, they are also mandated to satisfy GLBA requirements PCI-DSS. Some schools have also embraced education-specific frameworks for proactive risk management, such as the Educause-sponsored HECVAT.

The burden of manually processing multiple risk and compliance frameworks can quickly become overwhelming and untenable. Hiring additional Risk Management & InfoSec resources to try to execute these requirements is time consuming & expensive in this tight job market. Henceforth schools are investing in GRC platforms that leverage automation & orchestration to scale their risk and compliance programs, and this is exactly the functionality and value that Centraleyes provides.

Centraleyes provides the tools to programmatically capture data, calculate your risk scores, and deliver actionable remediation paths to mitigate risks and enhance your risk posture. Here's how Centraleyes helps organizations establish scalable risk programs:

- Operationalize in a single day, not months – our intuitive console allows you to set up users, frameworks, and vendors quickly
- Multi-tenancy allows you to assess risk by individual colleges, schools, campuses and functional departments
- Pre-defined surveys for industry standard risk & compliance frameworks are built into the platform
- Reduces "assessment fatigue" – our SmartMapping feature correlates common controls across frameworks and crosswalks answers, evidence and artifacts, allowing you to answer once and proliferate across all the framework

Centraleyes: Next Generation GRC

Cyber Risk Management

Banks, telecom companies, health organizations, insurance companies and all other enterprises need a GRC platform that offers high visibility and clarity to stay ahead and actively manage their risks as they work to meet greater compliance requirements. A highly effective GRC program is crucial to thrive in today's rapidly evolving risk and compliance landscape.

Centraleyes is a powerful no code, cloud-native, multi-tenant and real-time risk management platform that is changing the world of GRC.

The next generation Centraleyes cyber risk management platform has completely automated the way traditional GRC tools work. The platform frees risk and security teams from tedious, repetitive labor so they can focus on strategic decision-making and business success.

Centraleyes was developed based on a methodical customer-centric approach, where feedback from over 200 companies uncovered the greatest GRC pain points in the market.

Centraleyes is on a mission to become the best GRC platform on Earth

Through the power of automation, we help companies overcome their biggest GRC challenges, transforming risk management into a dynamic, easy, and ongoing process, rather than a overwhelming amount of manual and inefficient work.

By always focusing on the customer's outcomes, we make GRC a more efficient, more intuitive, and ultimately, a more beautiful experience.

The Centraleyes Solution

Implement and onboard in under 60 seconds, train and operationalize in only a few hours

Immediately automate risk and compliance management with over 100+ built-in frameworks and standards. Utilize preloaded surveys, analyze and evaluate through integrated assessments — or upload your own

Implement automated actionable remediation steps and easily analyze data with visual dashboards

Generate real-time, comprehensive, & intuitive reports, and effortlessly convey your cyber risk and compliance posture to executives and auditors

The results are clear

Centraleyes gives information security and compliance teams the unmatched ability to see, understand, and mitigate costly risks and vulnerabilities. Organizations that deploy Centraleyes save time and resources by leveraging features such as Centraleyes SmartMapping, an automated risk register and an automated remediation planner. By implementing the Centraleyes Platform you will sustain cyber resilience in a world of ever-evolving risks while continuously meeting compliance across frameworks such as: **NIST, PCI, GLBA, FERPA, HECVA** and many more.

What Can You Do With Centraleyes?

Implement and Onboard in Minutes

Deploy the platform in minutes with no code or learning curve and configure it to fit your organization's unique structure

Supports APIs with top security tools and features 100+ pre-loaded industry frameworks and standards

Multi-tenancy allows for team collaboration, greater accountability and increased productivity

Automate and Orchestrate the Manual Work

Automate workflows and alerts with AI powered remediation planning and an automated risk register

Leverage SmartMapping to automatically map and crosswalk your controls from framework to framework

Quantifiable metrics for precise insights, creating real-time and historical benchmarks

Communicate Risk Like Never Before

Convert technical risk into business risk demonstrate empirical data trends

Automatically generate reports, increase satisfaction and productivity

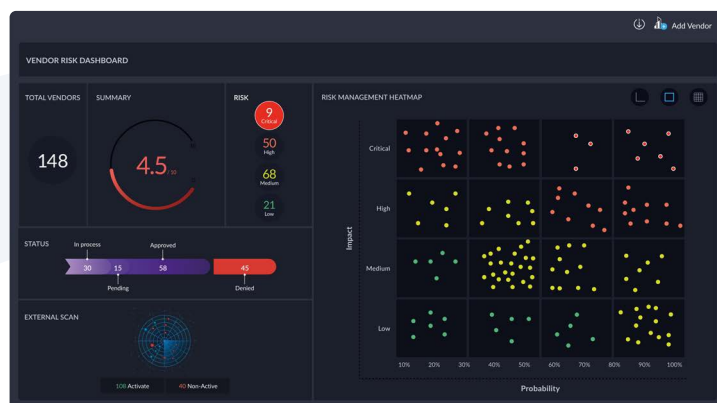

Cutting-edge visual dashboard and reports, clear and easy to comprehend

Core Products

1st Party

Take control of internal risk and compliance by automating and orchestrating data collection, analysis, and remediation on one platform.

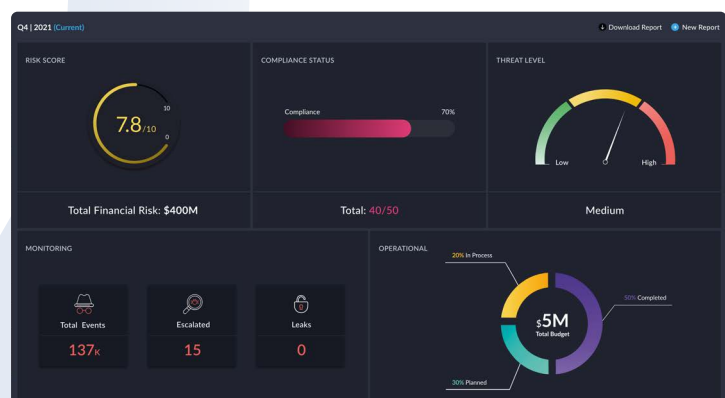

3rd Party

Rapidly assess, categorize, and prioritize 3rd Party vendors at scale through a single pane of glass, while monitoring your portfolio, reducing risk and safeguarding ROI.

Boardview

Automatically translate data into non-technical, comprehensible reports, including budget allocation, financial risk interpretations, current risk management posture, remediation steps, and more.

Centraleyes Use-Case

Internal Risk Management

Centraleyes enables companies to quantify, prioritize and mitigate operational risks. Easily manage your entire life cycle within the platform's environment using up-to-date threat intelligence, automation, visual dashboards, and executive-level reporting.

Onboard and conduct risk assessments in 60 seconds

Save hundreds of hours by leveraging our cutting-edge platform's 100+ pre-loaded frameworks and automation capabilities.

Turn risk management into a collaborative process

Upload and share your own internal assessments to the platform to boost collaboration and track progress.

Customize the platform to your needs

Fully customize our enterprise risk register with your specific risks, controls, processes, and use cases. Configure impact and probability levels, tag open remediation tasks, and map out relevant risks.

Quantify and manage inherent and residual risk across the

Eliminate time-consuming manual processes with automated remediation planning. Oversee mitigation plans that are automatically created by the platform.

Access data-rich insights and reporting tools

Maximize executive-level support and decision making with intuitive reports that highlight cyber risk in business terms.

Centraleyes Use-Case

Compliance Management

Centraleyes streamlines what can be an inefficient and painful process through the power of automation, giving companies a next-generation solution that offers a real-time snapshot into your compliance program.

Get started in only 60 seconds

Give users immediate access to a powerful solution that can monitor and assess systems to ensure they comply with industry and security standards, as well as corporate and regulatory policies and requirements.

Automate and orchestrate all the manual work

Gain access to 100+ industry-leading frameworks and standards.
Use SmartMapping to pre-populate new frameworks and automated remediation to guide you to full compliance.

Gain real-time visibility into your compliance

Centraleyes immediately creates a real-time picture of compliance levels, the remediation tasks needed to close gaps, and powerful insights to guide next-steps.

Improve decision making with executive-level reports

Keep your executives onboard with intuitive reports that measure cyber risk in business terms.

Simplify data collection and analysis

Manage all of your assessments and reports across multiple frameworks through one visual dashboard.

Centraleyes Use-Case

Vendor Risk Management

Centraleyes's powerful cloud-based platform helps organizations identify and mitigate security risks from third-party vendors, making it the ideal platform for companies looking to efficiently manage vendor risk at scale.

Onboard vendors in less than 60 seconds

Save hundreds of hours of manual follow up and work with self-attestation by vendors and access to 100+ pre-loaded frameworks.

One dashboard for all your vendors

Continually assess, categorize, and prioritize hundreds of vendors through one centralized dashboard.

Achieve faster and more efficient remediation

Use automated remediation planning to track progress and gain valuable insights into a vendor's risk exposure.

Take a hybrid approach to vendor risk management

Access the only hybrid vendor risk solution that ensures you are consistently updated of any security gaps in a vendor's risk profile.

Generate executive-level reports

Provide your executives with actionable insights that identify where your risks lie, all in real-time.

Centraleyes Use-Case

Boardview Risk Management

Centraleyes simplifies every aspect of executive level reporting by turning complex technical risk into actionable insights that can be shared with C-level executives, Board of Directors, and other key stakeholders.

Visualize your risk exposure

Illustrate your risk using interactive graphs, a 4D risk matrix, gap matrix, business alerts, remediation matrix, and attack funnels.

Improve the decision making process

Provide executives with data-driven business use cases that justify further cybersecurity investments.

Eliminate tedious manual work

Save hundreds of hours with automated report creation synthesized from captured internal survey & vendor risk data.

Measure cyber risk program improvements

Leverage historical data and benchmarks to show the progress being made towards your cyber risk management goals.

Convert technical risk into business risk

Create actionable reports that turn technical risk into comprehensible business risk.

Centraleyes Use-Case

Private Equity & M&A Risk Management

Centraleyes provides companies with a next-generation, multi-tenant risk management solution that can be rapidly deployed to assess, monitor, and visualize a company's governance, risk and compliance in real-time.

Onboard new companies in minutes

Apply 100+ pre-loaded industry frameworks and standards to any company in your portfolio.

Improve your due diligence processes

Quickly assess and score investment opportunities across multiple, relevant frameworks at scale.

Automate and orchestrate tedious, manual tasks

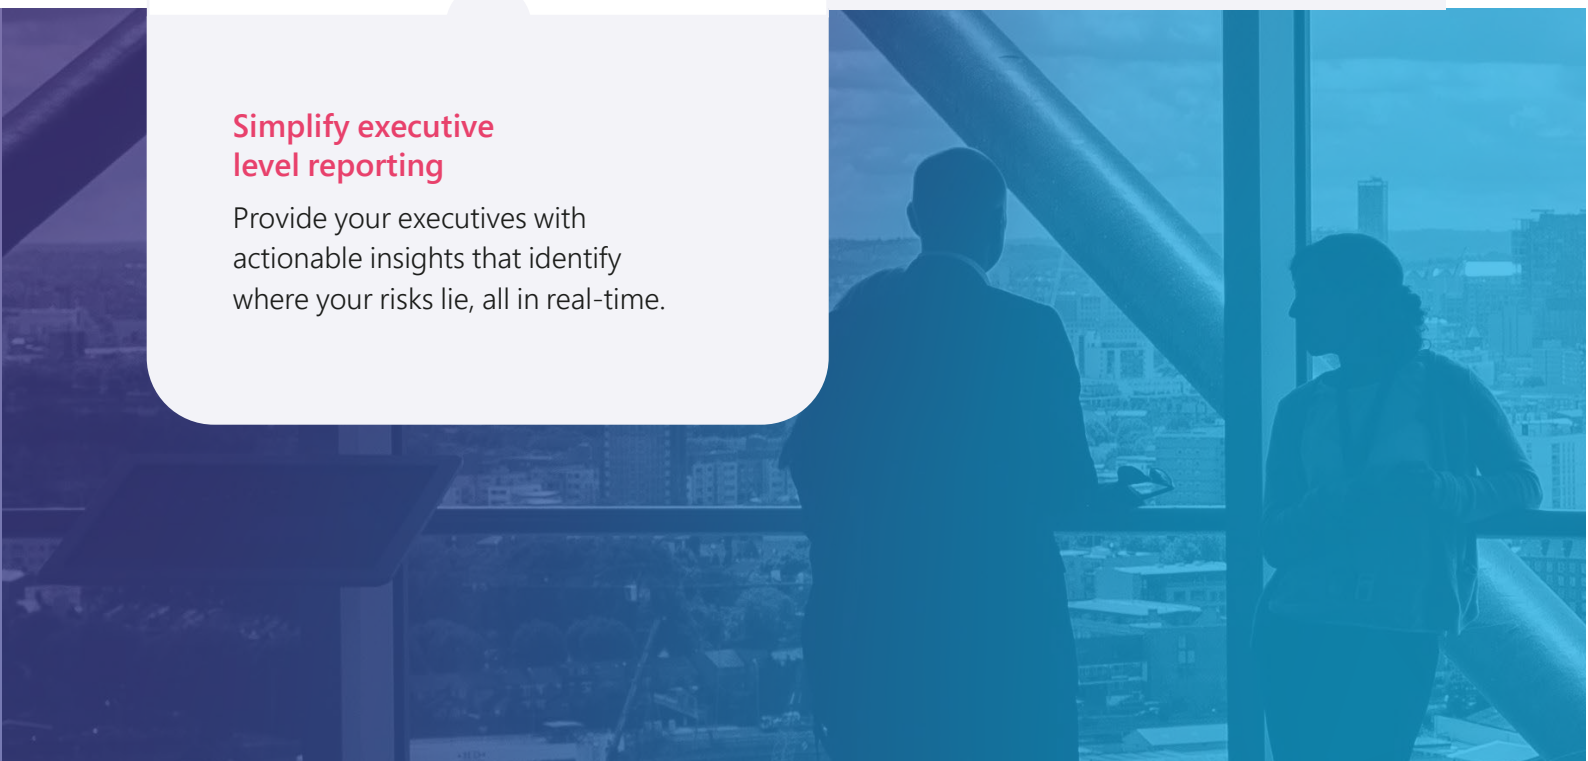

Understand your investments risk posture in real-time, track progress, and minimize exposure to risk with automatically generated remediation steps and insights.

Create industry-specific data benchmarks

Maintain your competitive advantage by turning the data collected from the M&A process and your portfolio into deep industry insights, steps and insights.

Simplify executive level reporting

Provide your executives with actionable insights that identify where your risks lie, all in real-time.

Centraleyes Use-Case

Partner Risk Management

Centraleyes gives companies a cutting-edge solution for all aspects of partner risk management. Rapidly assess partner risk, automate remediation planning and orchestration, measure progress in real-time, and simplify executive reporting.

Onboard new partners in 60 seconds

Apply 100+ pre-loaded industry frameworks and standards to partner companies.

Protect yourself from third-party risk

Quickly assess and score partner companies across multiple, relevant frameworks via a single dashboard.

Automate manual risk management tasks

Automated remediation planning and orchestration help you track, prioritize, and mitigate partner risk.

Gauge third-party GRC in real-time

Determine a partner's risk exposure using real-time scores, quantifiable metrics, and industry benchmarks.

Keep executives informed about partner risk

Automatically generate detailed reports that turn technical risk into business risk.

Centraleyes is the industry's latest, most advanced cloud-based integrated cyber risk management platform. Centraleyes gives organizations the unparalleled ability to automate and orchestrate their entire cyber risk and compliance processes. Centraleyes provides an exceptional ability to see, understand, and react to cyber risks in a dynamic and effective way. Organizations that deploy Centraleyes save time and resources, and increase their cyber resilience in a world of ever-evolving risks. It is truly cyber risk management reimagined.
