

Effective Risk Management Begins with Executive Support

Effective cybersecurity starts from the top so keeping leadership up to speed on risk management is crucial — **and with Centraleyes, it's simpler than ever.**

Create Meaningful Reports

Generate cutting-edge, intuitive reports that financially quantify and contextualize cyber risk in business terms.

Flexible Progress Tracking

Set high-level targets or drill down to specific controls, then measure progress by combining real-time and historical data.

Smarter Actions

Leverage AI-powered risk management tools to make informed investment decisions, remediate risks, meet compliance and secure your organization from attacks.

The Challenge: **Understanding the Technical Language of Risk Management**

Cyber risk management is incredibly complex, especially in the current landscape.

That complexity should not impede visibility. Executive-level reports are vital to convey your organization's risk management targets, progress, and shortcomings. Taking the highly technical findings and translating them into clear business terms is a difficult balancing act. Yet understanding the repercussions of cybersecurity decisions is critical to the operation and resilience of your organization.

Centraleyes: **Executive-Level Cyber Reports Simplified**

As the world's most advanced cloud-based risk management solution, Centraleyes bridges the gap between leadership and cyber risk professionals. From its centralized dashboard, it's easy to set goals and measure progress through a combination of both real-time and historic data. Its executive-level reporting is designed to be consumable for non-technical audiences, making it easy to provide a financial interpretation of risk.

We help you answer the most important questions:

1

What is your cyber status/posture?

2

Are we progressing or regressing?

3

How effective are our controls?

Go From Onboarding to Customized Reports in Minutes

Get onboarded in as little as 60 seconds, giving you access to 50+ pre-loaded risk and compliance frameworks for all your data reporting needs. Centraleyes makes it easy for you to create customizable reports designed specifically for your executive teams.

Save countless hours converting data into executive-level insights

Apply 50+ pre-loaded industry frameworks and standards

Use Smart Mapping to simultaneously measure compliance against other frameworks and standards

Automate the Entire Reporting Process

Centraleyes simplifies the entire risk assessment and remediation process allowing you to automatically create reports that show measurable progress. Save hundreds of hours by automating the collection and analysis of technical risk through a cutting-edge, visual dashboard. Understand your risk exposure in real-time, track progress, and minimize your exposure to risk with automatically generated remediation steps and insights.

Create customized reports based on the data you collect through your risk assessments and ongoing remediation efforts

Ensure cybersecurity investments are continuously improving with deep insights into current and historical performance

Gain full visibility into the exact actions your organization is taking to improve security and compliance

Simplify Executive-level Reporting

Save resources using automated analysis and report tools that allow you to track progress over time. Maximize executive-level support with easily comprehensible reports that highlight how cyber risk is affecting your business. Break data down into visual reports that represent your current state of affairs, so you can make informed decisions and understand what matters.

Identify the total cost of your risk while discovering potential savings from further investments into cybersecurity and compliance

Convert technical risk into business risk with quantifiable metrics and industry benchmarks through empirical data trends and intuitive scoring systems

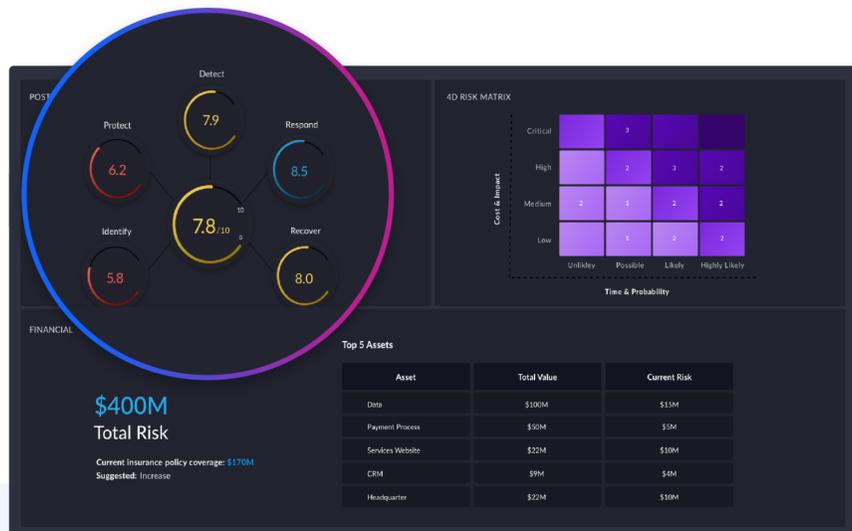

Convert compliance investments from a cost center into a business enabler with the ability to measure your progress towards individual compliance standards

Key Benefits

Reporting

- Deliver meaningful insights for more productive risk management discussions.
- Quantify risk management goals, targets, and processes.
- Direct investment with data-driven business cases.
