

| Securing Your Supply Chain - Vendor Risk Management

Your vendor's risk is your risk too. Make smart, informed decisions to protect your organization.

Secure your vendor and partner ecosystem with Centraleyes.

Streamline Vendor Assessments

Onboard vendors in under 30 seconds and assess hundreds of vendors in record time.

A ready-to-use solution easily integrated with existing infrastructure, no code necessary.

Mitigate Risk

Automatically identify the highest-risk vendors and provide actionable guidance on threat mitigation. Use the automated remediation center and generate clear reports with customizable views.

Visualize Your State

Use the centralized dashboard for a comprehensive view of your vendor risk posture and to produce clear, relevant analytic reports.

The Challenge:

Assessing Vendors Accurately at Scale

Your ecosystem no longer ends at your network's edge. Third party organizations are as pivotal to your risk posture as your internal infrastructure. While your vendors may be mission-critical, they can also pose an acute risk to your organization.

A vendor lacking adequate security controls can provide a back-door into your network, allowing threat actors to carry out cyber attacks, data breaches or worse. [IBM research](#) shows that over 60% of breaches stem from third-party vendors.

Outdated, inefficient solutions and spreadsheets are no longer capable of mitigating this risk. Protecting your organization from your supply chain demands both fast remediation and accurate, real-time monitoring. It demands that you leave legacy behind.

Centraleyes:

Vendor Risk Management Simplified

As the world's most advanced cloud-based integrated risk management platform, Centraleyes reimagines how businesses quantify and manage vendor risk. It automatically aggregates data from vendors, real time threat intelligence, and active perimeter scanning. The results of the data are then presented clearly to generate actionable insights and remediation steps, helping identify threats, classify high-risk vendors, and provide remediation guidance.

Top Features

Onboard hundreds of vendors
in under 60 seconds each

Real-time data and full control
through a cutting-edge
centralized dashboard

Advanced visual reporting for
informed decision making

AI-powered planning,
orchestration, and
remediation center

Active, simultaneous monitoring
for hundreds of vendors

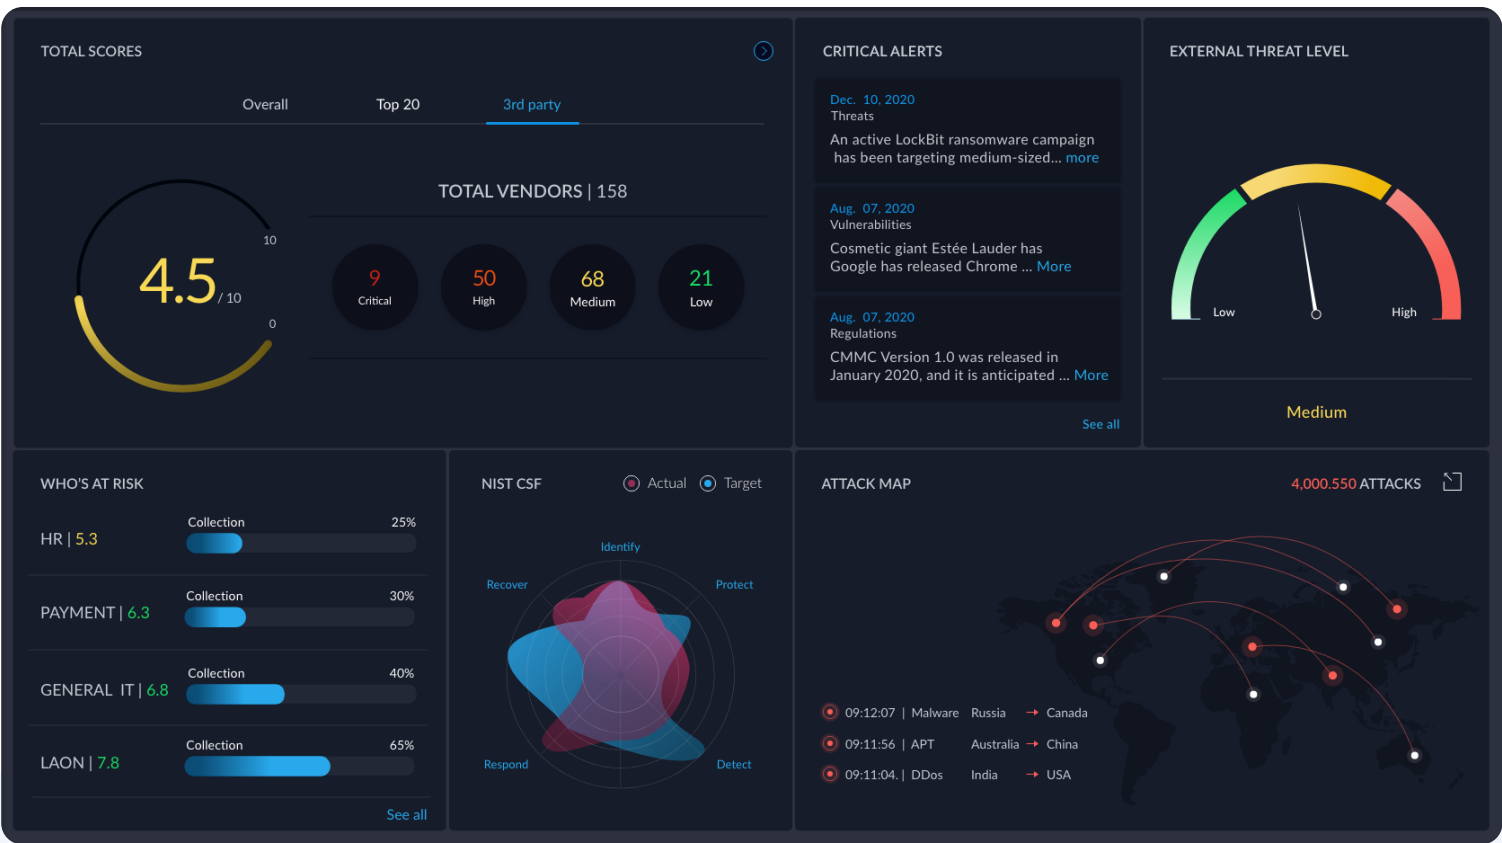

External threat intelligence and
scanning capabilities for
comprehensive risk quantification

Key Benefits

Streamline Your Selection Process

- Assess hundreds of prospective vendors in record time.
- Prioritize vendor risks with ease for timely decision making.
- Eliminate manual spreadsheets and data collection, reduce errors and oversight.

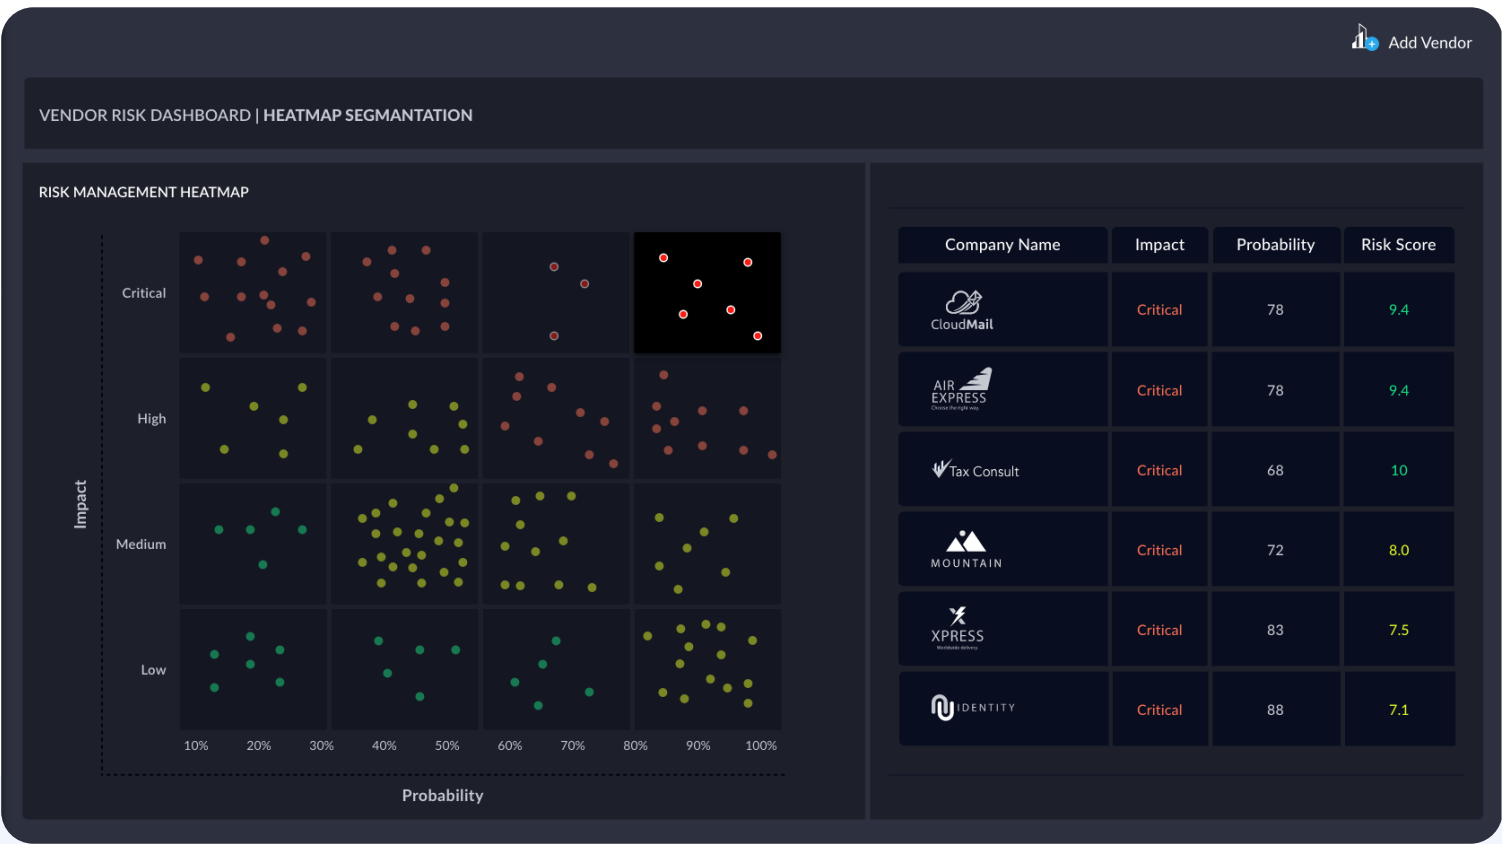

See The Bigger Picture

- Measure the impact and probability of an attack on each vendor in real time.
- Receive constant updates on security gaps and threats.
- Full, real-time visibility of both your vendors and their vendors.

Less Labor, More Resilience

- Provide vendors with immediate, actionable remediation guidance.
- Assign tasks, track progress and collaborate across vendor teams for efficient data collection
- Identify high-risk vendors early in the selection process through a comprehensive risk approach.

Reduce Supply Chain Management Cost

- Manage every aspect of vendor risk from A-Z in a single-solution platform
- Save hundreds of hours of labor.
- Transparent, affordable pricing with no hidden fees.

Infinite Scale

- Scale up with ease and maintain a secure supply chain as your business grows.
- Easily integrated alongside existing tools and infrastructure.
- Streamline workflows and processes to maximize efficiency and productivity.

Centraleyes is the industry's latest, most advanced cloud-based integrated cyber risk management platform. Centraleyes gives organizations the unparalleled ability to automate and orchestrate their entire cyber risk and compliance processes. Centraleyes provides an exceptional ability to see, understand, and react to cyber risks in a dynamic and effective——way. Organizations that deploy Centraleyes save time and resources, and increase their cyber resilience in a world of ever-evolving risks. It is truly cyber risk management reimagined.
